Pixlr Express beta 3 is a lightweight, offline image editor designed for mobile devices. How to Use: - Attach the phone to a computer, launch Pixlr Express and either: 1) Load an image. Hi, i have patch 1.0.7.0 installed and i need to update to patch 1.0.7.2. SUPER. Super Mario Land 2. A federal judge Wednesday decided to place the entire case, involving illegal gatherings and the National Security Agency's collection of metadata about phone calls, into private proceedings and seal the documents, following a request from the Obama administration and partially reversing a ruling by a judge in San Francisco. The ruling unsealed the courts' orders involving the plaintiffs, covered a wide range of documents and called for some to be kept secret, a sharp departure from traditional protocols for federal courts. SEE ALSO: Judges to decide on NSA spying program Tuesday Most of the documents are heavily redacted, but the court ruled that the case can continue, and the city of Los Angeles and other plaintiffs could refile their cases later if they want to see full versions of the documents. Judge Jeffrey S. White of San Francisco had ordered the bulk of the documents in the case to be kept secret, saying that an "irreparable injury" to the litigants would occur if they had access to a "portion of the materials." But in a decision issued this morning, he ruled that the case could continue under seal. White had ruled last month that the district of Massachusetts was too far from San Francisco, where the NSA headquarters is located, to properly serve as the location of most of the plaintiffs. He also said he was moving the case to Los Angeles because "the best resource on national security issues is the government," and federal judges in the capital are more likely to have "more sophisticated understanding" of the issues. When he ruled that the plaintiffs could proceed, White had ordered the NSA to release nine of the 1,000 pages of court documents already turned over to the plaintiffs. In the decision, White said the plaintiffs had made a "plausible case," and that both they and the government would suffer "irreparable harm" if the case were moved to Los Angeles. He also said that the "significant evidentiary issues" in the case should be resolved based on as much information as the government chooses to disclose. The case is one of the several that have arisen from leaks of documents
