It is an add-on to AutoCAD 2010 and can be used with AutoCAD 2010 or AutoCAD LT 2010. The new modeler was praised by Autodesk 3D Review and was one of the most used 3D software applications. 3D modeling features include: Solid modeling, allows for both 2D and 3D modeling. The ability to model in a single CAD drawing or a single.dwg file (with multiple assemblies). Placing and editing 3D objects. Import and export of 3D models to different file formats. Embedding 3D models into AutoCAD drawings. There are also limitations to the features including: It was only available for AutoCAD 2010 and LT 2010. Field of the Invention The present invention relates to an automated ticket vending system for vending tickets or other articles for sale, particularly tickets for admission into a concert, sports event or the like. 2. Description of the Prior Art Automated ticket vending systems have been developed to dispense tickets of various kinds. For example, U.S. Pat. No. 5,188,404 (Boyd) shows a system for vending printed ticket stubs having magnetic strips on them. The ticket stubs are inserted into a receptacle having a magnet and a reader which senses the presence of the magnetic strip and, upon detection of the strip, actuates a printing means to print indicia on the ticket stub. An article feeder may be used to feed ticket stubs to a vending station. In U.S. Pat. No. 5,260,817 (Gerbe), an article dispenser is shown with a dispenser module which is mechanically linked to a printer in which the print station is housed. The printer has a roll of perforated ticket stock on which indicia are printed as tickets are dispensed from the module. The article feeder may have a push button feed mechanism or a pickup mechanism which may be actuated by a coin or credit card reader. U.S. Pat.
