Is it a crime to expect to have an excellent product in the standard of the competition these days and everyone else trying to rip off Microsoft and other software manufacturers as well? I have a desktop with two motherboards, two hard drives and two processors so I would like to test Linux on all of these but just cannot afford the \$100.00 or more these other people charge so please have one that will work with Windows 7 64 bit and a standard Windows CD if possible. The problem with your metaphor is that it is
